		WT: 182 lb HT: 5'9" BP 130/90
		R: 18 P: 20 T: 98.2
		- (R) knee pain -
		(R) knee still buckling more laterally. Knee buckles, using step up succeeds whenever he can. Sings in last month, leg "subluxing" according to him, even a brace on. Since sleeping on at night, knee "displaces". Says even a brace on it subluxes. Then he cannot straighten the knee for a week. Don't want anything for pain.
Exercise -		at least male NAD. 2
do activities		knee brace on.
in chair		knee cap intact.
upstairs		no swelling or redness noted.
looks.		(S) drawer
Don't go to		(S) The Thursday.
the		(S) (S) 10/18 pain.
Does calf		(S) Refer to Dr. Padua for
care.		evaluation.
		Knee brace on during day + night until ready for Padua.
		Addendum: Jack - falling feet on.
		Hand pain.
		1 dot 1-2 tabs. 0.6-80
		pin #30.
		For matters - need to see
		to inquire & housing
